

ACRtec™  
Alchemco *Clean & Repair*  
ACCELERATORS

INNOVATION. **PROTECTION.** *SUSTAINABILITY.*

**ACRtec™ Alchemco Clean & Repair** is our complete line of accessory and system compatible products. It offers two products designed to enhance the waterproofing systems. The ACRtec NC100 Surface Accelerating Agent is used in new construction to increase the effectiveness of sealing small cracks in freshly poured concrete. The ACRtec Surface Accelerating Agent is intended for existing concrete to help seal small cracks and voids. ACRtec's Alchemco Clean & Repair line includes accessory and system-compatible products, all designed to complement the waterproofing systems and enhance overall performance.

Alchemco's Acetic-Based Accelerating Agents, including the ACRtec Surface NC100, and ACRtec Crack Accelerating Agents, are designed to enhance the effectiveness of Alchemco's Waterproofing Systems. Suitable for both newly poured and existing concrete, these solutions seal small cracks and voids strengthening concrete surfaces. They not only improve the durability of the concrete but also extend its lifespan by offering superior protection. Available in Ready-To-Use and Concentrate forms, these agents are intended for use exclusively with Alchemco's products for optimal concrete protection and performance. Perfect for commercial and residential projects alike, they ensure long-lasting, reliable results.

### ACRtec Surface Accelerating Agent

1

Acetic based solution designed to be used in combination with Alchemco's Waterproofing Systems. ACRtec Surface Accelerating Agent increases the effectiveness of these products to seal small cracks and voids in the concrete. This product should only be used in combination with these products for on the concrete surface. Available in Ready To Use and Concentrate.

### ACRtec NC100 Surface Accelerating Agent

2

Acetic based solution designed to be used in on newly poured concrete. NC100 Accelerating Agent increases the effectiveness of these products to seal small cracks and voids in the concrete. This product should only be used in combination with these products for cracks and voids in the concrete surface.

### ACRtec Crack Accelerating Agent

3

Acetic based solution designed to be used in combination with Alchemco Waterproofing Systems. ACRtec Crack Accelerating Agent increases the effectiveness of these products to seal small cracks and voids in the concrete. This product should only be used in combination with these products for cracks and voids in the concrete surface.

### Complete Tailored Systems

4

Alchemco understands every concrete structure is different. We cater our systems to fit your concrete to protect better and longer.

## ENZYME MODIFIED SUBSURFACE WATERPROOFING

Alchemco® is revolutionizing the concept of 'long-term' concrete waterproofing solutions. Structures with a lifespan of 50-100 years deserve more than 5-10 years of product protection. We are setting industry standards with technology that ensures sustainability and reliability for decades, not just years.

Our Waterproofing Systems are specified by the best Architects & Engineers and applied by professional factory-trained and certified Contractors supervised by Alchemco's Field Technical Team.
